PANCHAL KEYUR H

Full Stack Developer

panchalkeyur694@gmail.com | +91 9106450963 | AHMEDABAD | LinkedIn | GitHub

SUMMARY

Full-Stack Developer with hands-on experience building production-grade web applications using React.js, Node.js, Express.js, and NestJS. I design RESTful APIs and scalable system architectures with a strong focus on secure authentication using JWT and RBAC. On the database side, I work with MongoDB (Mongoose) and PostgreSQL (Prisma ORM) for high-performance data management. I have also built end-to-end ERP-to-Shopify synchronization workflows with queue-based processing and audit logging. My overall approach centers on clean, maintainable code and backend optimization that supports business-critical operations.

KEY HIGHLIGHTS

- Delivered scalable ERP-to-Shopify integration solutions with reliable data synchronization and monitoring capabilities.
- Strong understanding of backend optimization, asynchronous processing, and high-performance application workflows.
- Hands-on experience developing operational dashboards, business automation features, and data management systems.
- Focused on writing clean, maintainable, and scalable code using modern development practices and design patterns.

PROFESSIONAL EXPERIENCE

Syndell Technology, *Full Stack Developer* 11/2025 – 06/2026 | Ahmedabad

- Optimized backend performance, API workflows, and data synchronization processes between multiple platforms, improving system efficiency and reliability.
- Designed, developed, and maintained scalable RESTful APIs using Node.js and Express.js, following industry best practices.
- Implemented secure authentication and role-based access control (RBAC) using JWT, ensuring robust application security and controlled user permissions.
- Integrated Prisma ORM with PostgreSQL to enhance database performance, maintainability, and developer productivity.
- Built a scalable ERP-to-Shopify synchronization system using NestJS and Next.js, enabling reliable data transfer and seamless platform integration.

EDUCATION

HSC, *Crystal International Public School* 2021 – 2022 | Ahmedabad, Gujarat

BCA, *Navgujarat Bca College* 2022 – 2025 | Ahmedabad, Gujarat

SKILLS

Frontend
- React
- Tailwind CSS
- Responsive UI Management

Backend
- Node.Js
- Express.Js
- Nest.js
- REST API

Database
- MongoDB
- Postgresql
- Prisma (ORM)
- Mongoose (ODM)

Tools
- Git
- Github
- Postman
- Vs Code

System & Architecture
- API Design
- Scalable Architecture
- Role Based Access Control (RBAC)

PROJECTS

Data Synchronization Platform
- Designed and developed scalable RESTful APIs using Node.js, Express.js, and Nest.JS to support business-critical application workflows.
- Developed secure JWT-based authentication and role-based access control (RBAC) to ensure users could access only authorized data and functionality.
- Built scalable ERP-to-Shopify synchronization services, enabling reliable and efficient data transfer between platforms.
- Improved backend performance and system scalability by implementing queue-based processing and background workers for asynchronous tasks.
- Built an audit logging system to monitor and track synchronization activities, improving visibility, traceability, and debugging capabilities.
- Integrated Prisma ORM with PostgreSQL to efficiently manage and store structured synchronized data while ensuring data integrity and maintainability.
- Developed responsive frontend interfaces and synchronization dashboards using React.js and Next.js, enabling efficient monitoring and management of ERP-to-Shopify synchronization workflows.

Book Store REST Api
- Architected and implemented a RESTful bookstore API using Node.js, Express.js, MongoDB, and Mongoose to manage books, reviews, users, and order-related operations.
- Implemented JWT-based authentication and authorization mechanisms to secure application resources and enforce user access controls.
- Integrated Stripe payment processing to support secure online transactions and streamline the checkout experience.
- Leveraged Redis caching to reduce database load, improve response times, and enhance overall application performance.
- Developed administrative reporting and analytics endpoints to provide insights into platform activity, user engagement, and sales metrics.
- Designed efficient MongoDB schemas and data models using Mongoose to support scalable data management and maintain application reliability.
- Built complete CRUD functionality for books and reviews, enabling seamless content management and user interaction across the platform.
